CHAPTER 38

Miscellaneous chemical products

Notes

- 1. This Chapter does not cover:
- (a) separate chemically defined elements or compounds with the exception of the following:
 - (1) artificial graphite (heading 3801);
 - (2) insecticides, rodenticides, fungicides, herbicides, anti-sprouting pro-ducts and plant-growth regulators, disinfectants and similar products, put up as described in heading 3808;
 - (3) products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades (heading 3813);
 - (4) certified reference materials specified in Note 2 below;
 - (5) products specified in Note 3 (a) or 3 (c) below;
- (b) mixtures of chemicals with foodstuffs or other substances with nutritive value, of a kind used in the preparation of human foodstuffs (generally, heading 2106);
- (c) slag, ash and residues (including sludges, other than sewage sludge), containing metals, arsenic or their mixtures and meeting the requirements of Note 3 (a) or 3(b) to Chapter 26 (heading 2620);
 - (d) medicaments (Heading 3003 or 3004);
- (e) spent catalysts of a kind used for the extraction of base metals or for the manufacture of chemical compounds of base metals (heading 2620), spent catalysts of a kind used principally for the recovery of precious metal (heading 7112) or catalysts consisting of metals or metal alloys in the form of, for example, finely divided powder or woven gauze (Section XIV or XV).
- 2. (A) For the purpose of heading 3822, the expression "certified reference materials" means reference materials which are accompanied by a certificate which indicates the values of the certified properties, the methods used to determine these values and the degree of certainty associated with each value and which are suitable for analytical, calibrating or referencing purposes.
- (B) With the exception of the products of Chapter 28 or 29, for the classification of certified reference materials, heading 3822 shall take precedence over any other heading in the Schedule.
- 3. Heading 3824 includes the following goods which are not to be classified in any other heading of this Schedule:

- (a) cultured crystals (other than optical elements) weighing not less than 2.5 g each, of magnesium oxide or of the halides of the alkali or alkaline-earth metals;
 - (b) fusel oil; Dippel's oil;
 - (c) ink removers put up in packings for retail sale;
- (*d*) stencil correctors, other correcting fluids and corrections tapes (other than those of heading 9612), put up in packings for retail sale; and
 - (e) ceramic firing testers, fusible (for example, seger cones).
- 4. Throughout the Schedule, "municipal waste" means waste of a kind collected from households, hotels, restaurants, hospitals, shops, offices, etc., road and pavement sweepings, as well as construction and demolition waste. Municipal waste generally contains a large variety of materials such as plastics, rubber, wood, paper, textiles, glass, metals, food materials, broken furniture and other damaged or discarded articles. The term "municipal waste", however, does not cover:
 - (a) individual materials or articles segregated from the waste, such as wastes of plastics, rubber, wood, paper, textiles, glass or metals and spent batteries which fall in their appropriate headings of the Schedule;
 - (b) industrial waste;
 - (c) waste pharmaceuticals, as defined in Note 4(k) to Chapter 30; or
 - (d) clinical waste, as defined in Note 6(a) below.
- 5. For the purposes of heading 3825, "sewage sludge" means sludge arising from urban effluent treatment plant and includes pre-treatment waste, scourings and unstabilised sludge. Stabilised sludge when suitable for use as fertiliser is excluded (Chapter 31).
 - 6. For the purposes of heading 3825, the expression "other wastes" applies to:
 - (a) clinical waste, that is, contaminated waste arising from medical research, diagnosis, treatment or other medical, surgical, dental or veterinary procedures, which often contain pathogens and pharmaceutical substances and require special disposal procedures (for example, soiled dressings, used gloves and used syringes);
 - (b) waste organic solvents;
 - (c) wastes of metal pickling liquors, hydraulic fluids, brake fluids and anti-freezing fluids; and
 - (d) other wastes from chemical or allied industries.

The expression "other wastes" does not, however, cover wastes which contain mainly petroleum oils or oils obtained from bituminous minerals (heading 2710).

7. For the purposes of heading 3826, the term "biodiesel" means mon-alkyl esters of fatty acids of a kind used as a fuel, derived from animal or vegetable fats and oils whether or not used.

- 8. This Chapter does not cover products containing alcohol, opium, Indian hemp or other narcotic drugs. For the purposes of this Note, "alcohol", "opium", "Indian hemp", "narcotic drugs" and "narcotic" have the meanings assigned to them in section 2 of the Medicinal and Toilet Preparations (Excise Duties) Act, 1955 (16 of 1955).
- 9. In relation to products of heading 3808, addition of chemicals and other ingredients like inert carriers or solvents, surface active dispersing and stabilising agents, emulsifires, wetting and dispersing agents, deodorant, masking agent, attractants and feeding stimulants to pesticidal chemicals in concentrated form, labelling or relabelling of containers intended for consumers or repacking from bulk pack to retail packs or the adoption of any other treatment to render the product marketable to the consumer shall amount to 'manufacture'.

10.In relation to products of this Chapter (other than products of heading 3808), labelling or relabelling of containers or repacking from bulk packs to retail packs or the adoption of any other treatment to render the product marketable to the consumer, shall amount to 'manufacture'.

SUB-HEADING NOTES

1.Sub-heading 3808 50 covers only goods of heading 3808, containing one or more of the following substances: aldrin (ISO); binapacryl (ISO); camphechlor (ISO) (toxaphene); captafol (ISO); chlordane (ISO); chlordimeform (ISO); chlorobenzilate (ISO); DDT (ISO) [clofenotane (INN), 1,1,1-trichloro-2,2-bis(p-chlorophenyl) ethane]; dieldrin (ISO, INN); 4,6-dinitro-o-cresol [DNOC (ISO)] or its salts; dinoseb (ISO), its salts or its esters; ethylene dibromide (ISO) (1,2 dibromoethane); ethylene dichloride (ISO) (1,2-dichloroethane); fluoroacetamide (ISO); heptachlor (ISO); hexachlorobenzene (ISO); 1,2,3,4,5,6-hexachlorocyclohexane [HCH (ISO)], including lindane (ISO, INN); mercury compounds; methamidophos (ISO); monocrotophos (ISO); oxirane (ethylene oxide); parathion (ISO); parathionmethyl (ISO) (methyl-parathion); pentachlorophenol (ISO), its salts or its esters; phosphamidon (ISO); 2,4,5-T (ISO) (2,4,5- trichlorophenoxyacetic acid), its salts or its esters; tributyltin compounds.

Sub-heading 3808 50 also covers dustable powder formulations containing a mixture of benomyl (ISO), carbofuran (ISO) and thiram (ISO).

2. For the purposes of tariff items 3825 41 00 and 3825 49 00, "waste organic solvents" are wastes containing mainly organic solvents, not fit for further use as presented as primary products, whether or not intended for recovery of the solvents.

SUPPLEMENTARY NOTES

In this Chapter:

- (1) "Ozone depleting substance" means a substance which—
 - (a) falls under this Chapter; and
- (b) is specified in Schedule I to the Ozone Depleting Substance (Regulation and Control) Rules, 2000.
- (2) "hazardous waste" means a substance which—

- (a) falls under this Chapter; and
- (b) is defined or specified in the Export and Import Policy of the Central Government issued from time to time,

and includes even waste oils and discarded containers specified in the Schedules to the Hazardous Wastes (Management and Handling) Rules, 1989.

SECTION VII

PLASTICS AND ARTICLES THEREOF, RUBBER AND ARTICLES THEREOF

Notes

- 1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:
 - (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
 - (b) presented together; and
 - (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.
- 2. Except for the goods of heading 3918 or 3919, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

Chapter 39

Plastics and articles thereof

Notes

1. Throughout this Schedule, the expression "plastics" means those materials of headings 3901 to 3914 which are or have been capable, either at the moment of polymerisation or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticiser) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.

Throughout this Schedule any reference to "plastics" also includes vulcanised fibre. The expression, however, does not apply to materials regarded as textile materials of Section XI.

- 2. This Chapter does not cover:
 - (a) lubricating preparations of heading 2710 or 3403;
 - (b) waxes of heading 2712 or 3404;
 - (c) separate chemically defined organic compounds (Chapter 29);
 - (d) heparin or its salts (heading 3001);
- (e) solutions (other than collodions) consisting of any of the products specified in headings 3901 to 3913 in volatile organic solvents when the weight of the solvent exceeds 50% of the weight of the solution (heading 3208); stamping foils of heading 3212;
 - (f) organic surface-active agents or preparation of heading 3402;
 - (g) run gums or ester gums (heading 3806);

- (h) prepared additives for mineral oils (including gasoline) or for other liquids used for the same purposes as mineral oils (heading 3811);
- (ij) prepared hydraulic fluids based on polyglycols, silicones or other polymers of Chapter 39 (heading 3819);
 - (k) diagnostic or laboratory reagents on a backing of plastics (heading 3822);
 - (1) synthetic rubber, as defined for the purpose of Chapter 40, or articles thereof;
- (m) saddlery or harness (heading 4201) or trunks, suit-cases, hand-bags or other containers of heading 4202;
 - (n) plaits, wickerwork or other articles of Chapter 46;
 - (o) wall coverings of heading 4814;
 - (p) goods of Section XI (textiles and textile articles);
- (q) articles of Section XII (for example, footwear, headgear, umbrellas, sun umbrellas, walking-sticks, whips, riding-crops or parts thereof);
 - (r) imitation jewellery of heading 7117;
 - (s) articles of Section XVI (machines and mechanical or electrical appliances);
 - (t) parts of aircraft or vehicles of Section XVII;
- (*u*) articles of Chapter 90 (for example, optical elements, spectacle frames, drawing instruments);
 - (v) articles of Chapter 91 (for example, clock or watch cases);
 - (w) articles of Chapter 92 (for example, musical instruments or parts thereof);
- (x) articles of Chapter 94 (for example, furniture, lamps and lighting fittings, illuminated signs, prefabricated buildings);
 - (y) articles of Chapter 95 (for example, toys, games, sports requisites); or
- (z) articles of Chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouth-pieces or stems for smoking pipes, cigarette-holders or the like, parts of vacuum flasks or the like, pens, propelling pencils).
- 3. Headings 3901 to 3911 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:
 - (a) liquid synthetic polyolefins of which less than 60% by volume distils at 300°C, after conversion to 1,013 millibars when a reduced pressure distillation method is used (headings 3901 and 3902);
 - (b) resins, not highly polymerised, of the coumarone-indene type (heading 3911);
 - (c) other synthetic polymers with an average of at least 5 monomer units;
 - (d) silicones (heading 3910);
 - (e) resols (heading 3909) and other prepolymers.
- 4. The expression "copolymers" covers all polymers in which no single monomer unit contributes 95% or more by weight to the total polymer content.

For the purposes of this Chapter, except where the context otherwise requires, copolymers

(including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer bends are to be classified in the heading covering polymers of that comonomer unit which predominates by weight over every other single comonomer unit. For the purposes of this Note, constituent comonomer units of polymers falling in the same heading shall be taken together.

If no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration.

- 5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.
- 6. In headings 3901 to 3914, the expression "primary forms" applies only to the following forms:
 - (a) liquids and pastes, including dispersions (emulsions and suspensions) and solutions:
 - (b) blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.
- 7. Heading 3915 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (headings 3901 to 3914).
- 8. For the purposes of heading 3917, the expression "tubes, pipes and hoses" means hollow products, whether semi-manufactures or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last-mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed 1.5 times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.
- 9. For the purposes of heading 3918, the expression "wall or ceiling coverings of plastics" applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.
- 10. In headings 3920 and 3921, the expression "plates, sheets, film, foil and strip" applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).
- 11. Heading 3925 applies only to the following articles, not being products covered by any of the earlier headings of Sub-Chapter II:
 - (a) reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300l;
 - (b) structural elements used, for example, in floors, walls or partitions, ceilings or roofs;
 - (c) gutters and fittings thereof;

- (d) doors, windows and their frames and thresholds for doors;
- (e) balconies, balustrades, fencing, gates and similar barriers;
- (f) shutters, blinds (including Venetian blinds) and similar articles and parts and fittings thereof;
- (g) large scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;
- (h) ornamental architectural features, for example, flutings, cupolas, dovecotes; and
- (*ij*) fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates.
- 12. In headings 3920 and 3921, the expression "flexible" means an article which has a modulus of elasticity either in flexture or in tension of not over 700 kilograms per square centimeter at 23°C and 50 per cent. relative humidity when tested in accordance with the method of test for stiffness of plastics (ASTM Designation D-747-63), for flexural properties of plastics (ASTM Designation D-790-63), for tensile properties of plastics (ASTM Designation D-638-64T), or for tensile properties of thin plastic sheeting (ASTM Designation D-882-64T) and "rigid" means all articles other than 'flexible' as defined above.
- 13. Notwithstanding anything contained in Note 12 to this Chapter, in headings 3909, 3921, 3923, 3924, 3925 and 3926 "rigid ployurethane foam" means cellular polyurethane with compressive strength of 0.418 to 28.14 kg./Cm² and flexural strength of 1.05 to 28.14 kg./Cm² when tested in accordance with American Standard (Designation ASTM-D-2341).
- 14. For the purposes of headings 3919, 3920 and 3921, the expression "film" means sheetings of thickness not exceeding 0.25 millimetres.
- 15. For the purposes of this Chapter, "insulated ware" shall mean any multi-walled or multi-layered article intended to provide thermal insulation.
- 16. In relation to the products of headings 3920 and 3921, the process of metallization or lamination or lacquering shall amount to "manufacture".

Sub-heading Notes

- 1. Within any one heading of this Chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions:
 - (a) where there is a sub-heading named "Other" in the same series:
 - (1) the designation in a sub-heading of a polymer by the prefix "poly" (for example, polyethylene and polyamide –6,6) means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95% or more by weight of the total polymer content;
 - (2) the copolymers named in sub-headings 3901 30, 3903 20, 3903 30 and 3904 30 are to be classified in those sub-headings, provided that the comonomer units of the named copolymers contribute 95% or more by weight of the total polymer content;
 - (3) chemically modified polymer are to be classified in the sub-heading named

"Other", provided that the chemically modified polymers are not more specifically covered by any other sub-heading;

- (4) polymers not meeting (1), (2) or (3) above, are to be classified in the sub-heading, among the remaining sub-headings in the series, covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same sub-heading shall be taken together. Only the constituent comonomer units of the polymers in the series of sub-headings under consideration are to be compared;
- (b) where there is no sub-heading named "Other" in the same series:
- (1) polymers are to be classified in the sub-heading covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same sub-heading shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration are to be compared;
- (2) chemically modified polymers are to be classified in the sub-heading appropriate to the unmodified polymer.

Polymer blends are to be classified in the same sub-heading as polymers of the same monomer units in the same proportions.

2. For the purposes of sub-heading 3920 43, the term "plasticisers" includes secondary plasticisers.
